HyperDeck Studio Mini

HyperDeck Studio Mini is a portable broadcast quality deck that records ProRes onto commonly available SD cards. You get 6G-SDI for recording all formats up to 2160p30, dual SD card slots for non-stop recording, a built in LCD screen and familiar VTR style front panel controls, all in a design that can be used on the desktop or in 1/3 of a standard rack space! HyperDeck Studio Mini also features 720p and 1080p 4:4:4:4 file support with fill and key outputs so it can be used as source to provide broadcast graphics to live production switchers for downstream keying over live video!
